Find academic journals that publish articles on a specific research topic

In Compendex, we would like to find the academic journals that published the largest number of articles retrieved by executing a search strategy on the topic of green roofs in urban areas.

Click Search and then select Expert to perform a complex search strategy.
Deselect the other databases in order to perform your search only in Compendex.

Select the time period.
1. Create the complex search strategy.

2. Click the search icon.

Check the pertinence of the results. If the results are not pertinent, modify the search strategy so the results are more relevant.

Turn autostemming off to disable automatic truncation.
Click the arrow to display the facet Document type.

1. Select the document type Journal article and then...

2. ...Click Limit to.
Click the arrow to display the facet Source Title, where the titles of journals are.

These are the journals that published the largest numbers of articles retrieved by executing the search strategy.
